

13. SUPERVISION SERVICES

Need for supervision of a complete newbuilding? Need for a specialist for inspection of a specific area, discipline or problem? Are you looking for reliable, proven working procedure descriptions for supervision work?

We can supply experienced senior and junior supervisors for required disciplines and specific areas, starting from structure, welding and painting, to machinery and piping systems, to interior and exterior outfitting, to HVAC and other service systems, to cargo handling system and to electric, electronic, navigation and communication systems. All our supervisors have wide-ranging experience in shipyard and design office activities. They match well with a typical shipowner's team.

The supervisors are always supported with the extensive statistics and references of Deltamarin as well as by the experienced designers and specialists.

Plan approval is typically carried out in our office in Finland by dedicated specialists.

Typical supervision tasks include

- Project evaluation and assessment
- Yard evaluation and assessment
- Master plan and building procedure evaluation and assessment
- Support in final contract negotiations
- Plan approval
- Authority and class negotiations/approvals
- Model test supervision
- Makers' list/supplier selection support
- Site supervision including detail design, procurement, production, installation, outfitting, testing and trials at the yard and suppliers
- Inclining experiment
- Sea trials
- Guarantee inspections
